

MAYANK INANI

DevOps & Cloud Engineer | Software Engineer II

inanimayank7737@gmail.com | linkedin.com/in/inanimayank | inanimayank.github.io

PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with **3+ years** of hands-on experience designing and operating **production cloud infrastructure**, **CI/CD platforms**, **Kubernetes workloads**, and **deployment automation** on **AWS**. Proven ownership of end-to-end **infrastructure and release operations**, including **AWS EKS migrations**, **RabbitMQ migration** across AWS accounts, **Terraform-based automation**, and **CI/CD modernization** across **100+ repositories**. Reduced manual deployment effort by **90%** and improved deployment speed by **5x** through automation. Strong in **AWS**, **Kubernetes**, **Terraform**, **GitHub Actions**, **Docker**, **Helm**, **ArgoCD**, **observability**, and **DevSecOps**, with a growing focus on **AI-enabled infrastructure**, **AIOps**, and **MLOps**.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, RDS, IAM, CloudWatch, CloudFormation, EKS), Azure (VMs), Cloud Foundry
IaC: Terraform, Terraform Modules, Infrastructure Provisioning, Environment Migration, Ansible
Kubernetes: Amazon EKS, Kubernetes, Helm Charts, ArgoCD, Microservices Deployment
CI/CD: GitHub Actions, Jenkins, Octopus Deploy, TeamCity, Release Management, Deployment Automation
Scripting: Shell Scripting, Python, C#, JavaScript
Monitoring: New Relic, AWS CloudWatch, ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus
Databases: Neo4j, Amazon DocumentDB, PostgreSQL, Redis
Messaging: RabbitMQ, Apache Kafka
Security: Fortify SAST, BlackDuck SCA, DevSecOps pipeline integration
Version Control: Git, GitHub, GitLab

WORK EXPERIENCE

Software Engineer II – DevOps & Cloud (DevOps Engineer)

September 2025 – Present

Philips India Ltd · Bengaluru, India

- Owned end-to-end **RabbitMQ stack migration** across AWS accounts using **Terraform** and orchestration workflows, delivering **zero customer downtime** while introducing automation capabilities that improved operational consistency and reduced manual intervention by **80%**.
- Took initiative and delivered **Terraform-based patching workflows** for service stacks, enabling controlled updates to instance types, AMIs, user data, and disaster recovery configurations while improving consistency, traceability, and operational readiness.
- Leading **production release ownership** for multiple products, coordinating planning, documentation, approvals, validation, and post-release checks.
- Built hands-on expertise in **Amazon EKS** by deploying microservices with **Helm Charts** and managing GitOps delivery through **ArgoCD**.
- Contributed to **Cloud Foundry to AWS EKS** migration, supporting platform modernisation, container adoption, and Kubernetes deployment.

Software Engineer I – DevOps & Cloud (DevOps Engineer)

Jul 2023 – September 2025

Philips India Ltd · Bengaluru, India

- Architected **CI/CD pipelines** for *Dream Mapper* using CORMS Release Management, reducing release cycle time, supporting zero-downtime deployments, and enabling developers to deploy faster with minimal DevOps dependency.
- Led the **Octopus Deploy** automation initiative for *Dream Mapper*, creating standardized deployment workflows that reduced manual deployment effort by **90%**, improved deployment speed by **5x**, and strengthened release consistency.
- Migrated source control from **GitLab to GitHub** and moved **TeamCity builds to GitHub Actions**, standardising CI across **100+ repositories**.
- Supported **production on-call operations** and automated recurring alerts in New Relic and CloudWatch, using product expertise to reduce alert volume and noise by **20%** across Cloud Foundry environments.
- Maintained **Neo4j**, **DocumentDB**, **RabbitMQ**, and **ELK Stack** services to support high availability for mission-critical healthcare platforms.

Software Engineer Intern – DevOps

Jan 2023 – Jul 2023

Philips India Ltd · Bengaluru, India

- Built and published **custom GitHub Actions** to automate build and deployment to on-premises servers, accelerating developer feedback loops.
- Integrated **Fortify SAST** and **BlackDuck SCA** scans into GitHub Actions pipelines, enforcing DevSecOps standards on every pull request.
- Deployed the full **PIX Platform** on local and VM environments using **ArgoCD**, **Helm Charts**, and **Docker images**; gained hands-on Kubernetes cluster management experience.

PROJECTS

AI-Powered Slack Q&A Agent (n8n)

2024

Tech Stack: n8n, Slack API, LLM/Agent Workflows, Excel Integration

- Built a personal **n8n workflow** that ingests Excel spreadsheet data and answers **natural-language questions** via Slack, using a looped **AI agent** for iterative query parsing and response generation, which could improve document workflows and information retrieval efficiency by **40-50%**.
- Applied **agent orchestration** and **workflow automation** concepts learned through certification to a self-initiated, hands-on use case.
- Strengthened practical understanding of **AI-agent design** and automation patterns for **AIOps** and AI-driven infrastructure.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

2019 – 2023

Chandigarh University - 8.14 CGPA

Mohali, Punjab, India

CERTIFICATIONS

AWS Essential Training for Developers

LinkedIn Learning · 2024

DevOps Foundations

LinkedIn Learning · 2023

Build AI Agents & Automate Workflows with n8n

LinkedIn Learning · 2024

AI Pair Programming with GitHub Copilot

LinkedIn Learning · 2025
